Volunteer Geo-mapping Opportunity With COJ Parks/Rec and JaxGIS
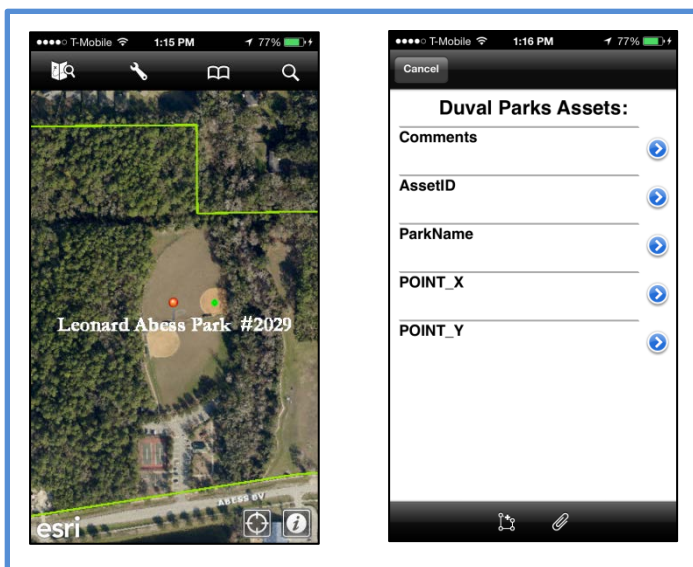

Take a Walk in the Park!

Collect community service hours by enjoying Jacksonville's amazing parks. While working alongside the JaxGIS team with the City of Jacksonville you will be using a mobile application and learning Geographic Information Systems (GIS). Yes, take out your phone! This mobile app will collect and/or update park assets by defining a location, a photo, and basic information about the asset, which will then be stored in a map-based database for the entire city.

What will the App do?

By collecting park assets, such as playground equipment and baseball fields, the application will ultimately allow park staff to visually identify specific assets, update, and correct information.

What's in it for you?

- Enjoy Jacksonville's parks
- Learn GIS
- Make a positive impact on your community by keeping our parks safer and up to date.

How do I get Involved?

If you're interested in learning more about the JaxParks division visit

www.Jaxparks.com.

For entry into this volunteer opportunity please contact:
